

## **Accompanying Note for distributing this Program**

Attached is a copy of **THE HUNTSVILLE RESPECT LIFE CURRICULUM** designed for implementation into schools. The curriculum is written for grades pre-kindergarten through twelfth and contains approximately ten Respect-life lesson plans per grade. This is meant to be used either as a guide for teachers or may be used as is. Hopefully, this curriculum will inspire further education regarding pro-life issues.

The curriculum consists of a primary document plus 6 additional documents (4 PowerPoint slideshows and 2 additional documents). In order to e-mail these interrelated documents as one unit, they have been placed in a zip file.

**Technical Note:** Because the Huntsville Program contains several documents we used what is called a "zip" file to contain them all. Your computer must have a zip program installed to open the file. If it does not you can download a zip program for free at <http://www.7-zip.org/>. If you do not want to install the zip program you can download the Huntsville Program's individual files on-line at <http://www.cpforslife.org/curriculum.htm>.

If you plan to forward this curriculum to anyone, please include this accompanying message in the text of your e-mail. Also, make certain that you **reattach the zip file** to your e-mail before sending it. This will ensure that the curriculum is forwarded in its entirety.

**This Pro-Life Curriculum is available at no charge at [www.CpForLife.org](http://www.CpForLife.org) and [www.KnightsForLife.org](http://www.KnightsForLife.org)** We only ask that you help forward this program to all your pro-life contacts and send us feedback on how the program works for your school or situation.
